

Safety Induction

M S N Engineering Pvt Ltd

Introduction

- 1. Proper Technical Skills**
 - 2. Personal Protective equipment**
 - 3. Safe Work Procedure**
 - 4. Identify the Risk & Hazards**
- 

Proper Technical Skills

Technical skills can refer to the ability to perform tasks that require the use of certain tools, whether tangible or intangible, and technology to complete them.

Without proper technical skills performing a task is inviting a Hazard by self.

Personal Protective Equipment

Refers to protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer's body from injury or infection. The hazards addressed by protective equipment include physical, electrical, heat, chemicals, biohazards, and airborne particulate matter.

Safe Work Procedure

safe work procedure (SWP) is an integral part of the risk management process. SWP put a strong barrier to the Hazards & Risks. It reduce the risk of Injury.

Identify the Hazards & Controlling the Risk

Being able to identify hazards is crucial in ensuring tasks are carried out safely. Your past experience in the workplace may help you to identify some hazards, but remember to also use the skills and knowledge of those around you to help.

Identifying hazards and controlling risk must be done continuously as new work processes, tasks, equipment and workers come into the workplace.

THANK YOU

The bottom left corner of the slide features a decorative graphic consisting of several overlapping geometric shapes. There is a large teal triangle pointing towards the bottom right, a smaller light blue triangle pointing towards the bottom left, and a small black triangle pointing towards the bottom right, partially overlapping the light blue one.
